DETAILED ACTION

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 26-30 have been renumbered 22-26.

Drawings

The drawings are objected to because there is no figure 4 (as mentioned in the specs) provided. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2828

With respect to claims 1-2, 4-5, 7-10, 13, and 18-24, it is not clear what the transition region is meant. Further, the claims fail to recite the functional performance of the transition region.

The remaining claims are dependent on the above rejected claims and therefore are also rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Marta et al. (US5745515).

With respect to claims 1, 5-6, 8-10, 14-15, 18-19, and 21-25, Marta show in Fig.1 a doped substrate 26, an active region 20 with quantum wells (col.9, 1.51-52), a doped bottom DBR 24, and a doped top DBR 14; wherein the top DBR includes a doped first mirror layer, a doped second mirror layer, and a first transition mirror region (col.9, 1.31-63).

With respect to claims 2 and 7, Marta show in Fig.1 a doped third mirror layer and a second transition mirror region between the second mirror layer and the third mirror layer (col.9, 1.31-63).

Art Unit: 2828

With respect to claims 3 and 11, Marta disclose AlAs (col.9, l.46-47).

With respect to claims 4, 12-13, 20, and 26, Marta disclose GaAs and AlGaAs mirror layers (col.9, l.31-63).

With respect to claim 16, Marta disclose the DBR including an insulating region 16.

With respect to claim 17 Marta disclose in Fig.1 a spacer 18.
